All things wood: Oiled Wide Plank Engineered Flooring

Sourcing the best product available from local Ontario and Quebec Suppliers so that we can provide superior service, quality craftsmanship and unique custom solutions to the architecture and design community to satisfy their project requirements. Whether plain sawn, quarter sawn, rift cut, wire brushed, or character saw marks and distressed textures, we specialize in oil finishes on select hardwood species from reclaimed sources or new growth forests. We feature North American white oak and French oak, birch, maple, hickory, and walnut - from widths as narrow as 3-1/4" up to extra-large format, wide 16" planks.
