

deborah mccarthy studios

Made in Canada

Don Bednar shoots large format, black & white infrared landscape images...

Imagine these photographs transformed into digitally printed glass mosaics as architectural surface decoration for either interior feature walls or exterior facades.

Digital printed mosaics is a system which allows for the reproduction of any high-resolution image onto a 98% recycled glass medium to create unique murals.

Contact Deborah for more information about Don's work and feature a Canadian artist's work in your next project.
