Let us introduce you to the world of outstanding commercial carpet solutions...

Brintons: Delivering inspired design and bold colours in woven Axminster carpet to create a unique atmosphere of comfort and sophistication for hotels and resorts, clubs and spas, casinos, public spaces and healthcare that defines design, performance and value.

Brintons is a global leader in the woven carpet manufacturing industry. In the 1950's, Brintons invented the 80 percent wool, 20 percent nylon blend solution for woven Axminster. This blend combines the advantages of wool - greater comfort underfoot, noise reduction, and improved air quality with the strength and durability of nylon for ease of cleaning and maintenance.

By choosing to work with Brintons, you will have access to a network of design studios and consultants, an innovative online design studio, and an archive of thousands of digital designs.

Brintons owns one of the world's largest commercial design archives and historical pattern libraries in the industry. I invite you to contact me for more information about the archive, technical features and process to help bring your creative vision to life. We provide a full custom sampling service, bespoke colour development, design print outs and woven trials.
